The pie charts below show the online shopping sales for retail sectors in New Zealand in 2003 and 2013.

Summarise the information by selecting and reporting the main features, and make comparisons where relevant.

Write at least 150 words.

In 2003, the clothing industry _____
(มีสัดส่วน) 24% of total online sales in New Zealand. _____ (อย่างไรก็ตาม), by 2013, the figure _____ (ลดลง) _____ (อย่างมาก) to 16%. Interestingly, online sales of books eventually _____ (ขึ้นมาเหนือ) sales of clothes, although books still only accounted for only 22% of the market.

The two pie charts compare the percentages of online sales across different retail sectors in New Zealand in the years 2003 and 2013. Overall, for three of the sectors, it is evident that over this time frame, there were significant changes in their proportion of online transactions.

At 36%, it can be seen that the travel sector accounted for the majority of online sales in 2003, but this percentage dropped to 29% by 2013. In contrast, ten years later, people chose increasingly to purchase movies and music, and its sales rose from only 21% to 33%, making it the retail sector with the highest overall share of the online market.

In 2003, the clothing industry represented 24% of total online sales in New Zealand. However, by 2013, the figure fell considerably to 16%. Interestingly, online sales of books eventually overtook sales of clothes, although books still only accounted for only 22% of the market.
