

Task 1 : 2 Line Graphs

The charts below show the changes in ownership of electrical appliances and amount of time spent doing housework in households in one country between 1920 and 2019.

Summarise the information by selecting and reporting the main features, and make comparisons where relevant.

Write at least 150 words.

Vocabulary

Vocabulary	Meaning
proportion/ percentage	สัดส่วน
ownership	การเป็นเจ้าของ
account for/ represent	มีสัดส่วน
increasingly (adv.)	มากขึ้นเรื่อยๆ
the figure + for	ตัวเลขของ
slightly (adv.)	อย่างน้อย
on average	โดยเฉลี่ย
decline/ decrease/ fall	ลด
consistently/ progressively (adv.)	เรื่อยๆ
reach the lowest point	ไปถึงจุดต่ำสุด

weekly (adj.)	ຕໍ່ອາທິດ
---------------	----------

The line graphs compare the proportion of ownership of three different electrical appliances: refrigerators, vacuum cleaners, and washing machines, and time spent weekly on household chores over a 99-year period from 1920 to 2019.

Overall, it can be observed that ownership of all three electric devices experienced an upward trend, whereas the amount time spent on housework underwent a downward trend during the given time frame.

Starting in 1920, at 40%, washing machines accounted for the highest percentage of ownership, followed by vacuum cleaners and refrigerators at 30% and almost 0%, respectively. However, people seemed to increasingly use vacuum cleaners and refrigerators, as their figures grew drastically to 100% in 1980 and 2000, respectively. In the meantime, those of washing machines only rose slightly in 2019, to 75%.

With regard to the amount of time spent on doing housework, people spent 50 hours per week on average in 1920, and the number fell consistently to 20 hours in 1960. Finally, it is interesting to note that from 1960 onwards, people spent less time doing chores, as the number continued to decline and reached its lowest point at 10 hours weekly by the end of the given period.
