

Section 4 Technique

1. Noun or Adjective
 1. Noun - plural or singular
 2. คำนามซ้อนกัน - student dorms/ kitchen tables/ distribution centers
2. ลงท้ายด้วย preposition (in/ on/ at / under/ with/without/ from/...)
3. Synonym

SECTION 4 Questions 31–40

Complete the notes below.

Write **ONE WORD ONLY** for each answer.

Ocean Biodiversity

Biodiversity hotspots

- areas containing many different species
- important for locating targets for 31
- at first only identified on land

Boris Worm, 2005

- identified hotspots for large ocean predators, e.g. sharks
- found that ocean hotspots:
 - were not always rich in 32
 - had higher temperatures at the 33
 - had sufficient 34 in the water

Lisa Ballance, 2007

- looked for hotspots for marine 35
- found these were all located where ocean currents meet

Census of Marine Life

- found new ocean species living:
 - under the 36
 - near volcanoes on the ocean floor

Global Marine Species Assessment

- want to list endangered ocean species, considering:
 - population size
 - geographical distribution
 - rate of 37
- Aim: to assess 20,000 species and make a distribution 38 for each one

Recommendations to retain ocean biodiversity

- increase the number of ocean reserves
- establish 39 corridors (e.g. for turtles)
- reduce fishing quotas
- catch fish only for the purpose of 40

FOR PRACTICE

SECTION 4 Questions 31–40

Complete the notes below.

Write **ONE WORD ONLY** for each answer.

ETHNOGRAPHY IN BUSINESS

Ethnography: research which explores human cultures

It can be used in business:

- to investigate customer needs and 31
- to help companies develop new designs

Examples of ethnographic research in business

Kitchen equipment

- Researchers found that cooks could not easily see the 32 in measuring cups.

Cell phones

- In Uganda, customers paid to use the cell phones of entrepreneurs.
- These customers wanted to check the 33 used.

Computer companies

- There was a need to develop 34 to improve communication between system administrators and colleagues.

Hospitals

- Nurses needed to access information about 35 in different parts of the hospital.

Airlines

- Respondents recorded information about their 36 while travelling.

Test 3

Principles of ethnographic research in business

- The researcher does not start off with a hypothesis.
- Participants may be selected by criteria such as age, 37 or product used.
- The participants must feel 38 about taking part in the research.
- There is usually direct 39 of the participants.
- The interview is guided by the participant.
- A lot of time is needed for the 40 of the data.
- Researchers look for a meaningful pattern in the data.

Business

- insight (information) - need - as well as - providing information about **attitudes** (31)

- want

Kitchen - measure - the content - although the cups had **numbers** (32) - I cook couldn't **these easily** - to

Cellphone - cellphone were used/ calls/ how much **time** (33) they spent on the call so far / features

Computer - communication - no standard way - came up with (develop) idea for **software** (34) Hospital - records (information) of their **patients** (35) no matter where they were

Airline - smartphone - info - track (record) **emotions**(36) during...

Open-minded - hypo

Age brackets, or according to(based on=ตาม) **income** (37) or particular product

Be **comfortable** (38) talking about...

Based on 1st hand (direct) **observation** (39) ——-**INSTEAD** !!!!!

Imposing her own ideas

After...work is not finished / 80% of their time *not on collecting* but on **analysis** (40)

SECTION 4 Questions 31–40

Complete the notes below.

Write **ONE WORD ONLY** for each answer.

ETHNOGRAPHY IN BUSINESS

Ethnography: research which explores human cultures

It can be used in business:

- to investigate customer needs and 31
- to help companies develop new designs

Examples of ethnographic research in business

Kitchen equipment

- Researchers found that cooks could not easily see the 32 in measuring cups.

SECTION 4 Questions 31–40

Complete the notes below.

Write **ONE WORD ONLY** for each answer.

The use of soil to reduce carbon dioxide (CO₂) in the atmosphere

Rattan Lal:

- Claims that 13% of CO₂ in the atmosphere could be absorbed by agricultural soils
- Erosion is more likely in soil that is **31**
- Lal found soil in Africa that was very **32**
- It was suggested that carbon from soil was entering the atmosphere

Soil and carbon:

- plants turn CO₂ from the air into carbon-based substances such as **33**
- some CO₂ moves from the **34** of plants to microbes in the soil
- carbon was lost from the soil when agriculture was invented

Regenerative agriculture:

- uses established practices to make sure soil remains fertile and **35**
- e.g. through year-round planting and increasing the **36** of plants that are grown

California study:

- taking place on a big **37** farm
- uses compost made from waste from agriculture and **38**

Australia study:

- aims to increase soil carbon by using **39** that are always green

Future developments may include:

- reducing the amount of fertilizer used in farming
- giving farmers **40** for carbon storage, as well as their produce

- 13% of CO₂
- Dark, crumbly and fertile / retain (=keep) some water/ but erosion can occur(happen) if the soil is **dry** (31)
- Africa - organic - extremely **hard** (32)
- Absorb - transform it into **sugars** (33)
- Some transfer from the **roots** (34)...
- Boost the **fertility** of soil and keep(remain/ stay) it **moist** (35)
- Increasing the **variety** (36) of plant being grown
- On a Large **cattle** (37) farm
- Waste - agricultural, including...////produced in **gardens** (38), such as....
- By cultivating **grasses** (39) that stay(remain/ keep) green all year round...
- US - fertilization / change of system/ receive **payments** (40) for (not only...but also) *but also for the carbon they store in their soil*
