Listening

PART 4 Questions 31–40

Complete the notes below.

Write **ONE WORD ONLY** for each answer.

How the Industrial Revolution affected life in Britain

19th century

- For the first time, people's possessions were used to measure Britain's **31**
- Developments in production of goods and in **32** greatly changed lives.

MAIN AREAS OF CHANGE

Manufacturing

- The Industrial Revolution would not have happened without the new types of **33** that were used then.
- The leading industry was **34** (its products became widely available).
- New **35** made factories necessary and so more people moved into towns.

Transport

- The railways took the place of canals.
- Because of the new transport:
 - greater access to **36** made people more aware of what they could buy in shops.
 - when shopping, people were not limited to buying **37** goods.

Retailing

- The first department stores were opened.
- The displays of goods were more visible:
 - inside stores because of better **38**
 - outside stores, because **39** were bigger.
- **40** that was persuasive became much more common.

Social Science/ History

- Consumerism – buying and selling – ordinary part
- Indication of the **wealth** of the country
- Improvement in how goods were made and **technology**
- Taken place (occur) – new sources of **power**
- The most advanced industry was **textiles**
- Enormous(gigantic – big) new **machines** — faster – more space – so large factories were built
- Railways were developed — included **newspapers** – people more knowledgeable but also read about shops
- Distribution more efficient – instead of **local** market
- New ways to attract customers
- Improved **lighting** inside
- Outside – use of plate glass – possible for **windows** to be much larger
- Availability – **advertising** trying persuade(v.) convince/ make believe people to go shopping – before long – turned into necessity

How to

- Colour described as
- Very
- Best growing conditions and.....
- Used hot_____
- Have the correct_____
- a _____ carries the sap....
- Heated by means of a_____
- A lot of _____ is produced
- Syrup look_____
- Sap is needed to make a_____

Test 4

PART 4 Questions 31–40

Complete the notes below.

Write **ONE WORD ONLY** for each answer.

Listening test audio

Maple syrup

What is maple syrup?

- made from the sap of the maple tree
- added to food or used in cooking
- colour described as **31**
- very **32** compared to refined sugar

The maple tree

- has many species
- needs sunny days and cool nights
- maple leaf has been on the Canadian flag since 1964
- needs moist soil but does not need fertiliser as well
- best growing conditions and **33** are in Canada and North America

Early maple sugar producers

- made holes in the tree trunks
- used hot **34** to heat the sap
- used tree bark to make containers for collection
- sweetened food and drink with sugar

Today's maple syrup

The trees

- Tree trunks may not have the correct **35** until they have been growing for 40 years.
- The changing temperature and movement of water within the tree produces the sap.

The production

- A tap is drilled into the trunk and a **36** carries the sap into a bucket.
- Large pans of sap called evaporators are heated by means of a **37**
- A lot of **38** is produced during the evaporation process.
- 'Sugar sand' is removed because it makes the syrup look **39** and affects the taste.
- The syrup is ready for use.
- A huge quantity of sap is needed to make a **40** of maple syrup.

KEYWORD

Natural food product – like clear honey – plant fluids – natural product – thick **golden** – poured on to food – no preservatives – **healthy** alternative to sugar

Tree

– without fertilizers – however – criteria is fulfilled – sun + cool night – certain parts – 1. Canada and NA – **the climate** suit the tree

Indigenous community – hole – use containers to collect sap – didn't have storage – boil by placing(putting) pieces of hot **rock** until it turned into sugar
Changed little overall

Maple forests – tree have to be looked after – reach the **diameter** at around xxxx (correct) – 40 years

Maple needs right conditions to grow... – night – water from the soil / daytime – water pushed down – movement = sap needed for maple syrup

Drilling a hole and inserting **a tube** that ends in a bucket – sap = 98% water and sugar / nutrients – has to be boiled – using evaporators – **a fire** is built – syrup begins to form – large quantity of **steam** – thicker and denser

Sugar sand – filtered out – **cloudy** appearance(look) – and gritty taste
Packaged – 40 l of sap for one **liter** of maple syrup

Environment

Test 2

PART 4 Questions 31–40

Complete the notes below.

Write **ONE WORD ONLY** for each answer.

Agricultural programme in Mozambique

How the programme was organised

- It focused on a dry and arid region in Chicualacuala district, near the Limpopo River.
- People depended on the forest to provide charcoal as a source of income.
- **31** was seen as the main priority to ensure the supply of water.
- Most of the work organised by farmers' associations was done by **32**
- Fenced areas were created to keep animals away from crops.
- The programme provided
 - **33** for the fences
 - **34** for suitable crops
 - water pumps.
- The farmers provided
 - labour
 - **35** for the fences on their land.

Further developments

- The marketing of produce was sometimes difficult due to lack of **36**
- Training was therefore provided in methods of food **37**
- Farmers made special places where **38** could be kept.
- Local people later suggested keeping **39**

Evaluation and lessons learned

- Agricultural production increased, improving incomes and food security.
- Enough time must be allowed, particularly for the **40** phase of the programme.

Technology

Listening

Questions 34–40

Complete the notes below.

Write **ONE WORD ONLY** for each answer.

Uses of Nanotechnology

Transport

- Nanotechnology could allow the development of stronger **34**
- Planes would be much lighter in weight.
- **35** travel will be made available to the masses.

Technology

- Computers will be even smaller, faster, and will have a greater **36**
- **37** energy will become more affordable.

The Environment

- Nano-robots could rebuild the ozone layer.
- Pollutants such as **38** could be removed from water more easily.
- There will be no **39** from manufacturing.

Health and Medicine

- New methods of food production could eradicate famine.
- Analysis of medical **40** will be speeded up.
- Life expectancy could be increased.

Digital

Test 2

PART 4 Questions 31–40

Complete the notes below.

Write **ONE WORD AND/OR A NUMBER** for each answer.

The impact of digital technology on the Icelandic language

The Icelandic language

- has approximately **31** speakers
- has a **32** that is still growing
- has not changed a lot over the last thousand years
- has its own words for computer-based concepts, such as web browser and **33**

Young speakers

- are big users of digital technology, such as **34**
- are becoming **35** very quickly
- are having discussions using only English while they are in the **36** at school
- are better able to identify the content of a **37** in English than Icelandic

Technology and internet companies

- write very little in Icelandic because of the small number of speakers and because of how complicated its **38** is

The Icelandic government

- has set up a fund to support the production of more digital content in the language
- believes that Icelandic has a secure future
- is worried that young Icelanders may lose their **39** as Icelanders
- is worried about the consequences of children not being **40** in either Icelandic or English
