

# DAY 2 : GIVE YOUR OPINION LIKE A PRO! 💪

## #1 THING TO DO: KNOW HOW TO EXPRESS YOUR OPINION

### START YOUR SENTENCE WITH

- personally
- honestly
- to be honest
- from my point of view
- according to me/ my experience

### FOLLOWED WITH

- I believe that
- I would say that
- I think that
- I feel that
- I have a feeling that / I have an impression that

Honestly I feel like mathematics is too hard for children.

To be honest I have the impression that students in primary school shouldn't learn mathematics.

**DO YOU THINK IT'S**

To be honest, I feel like it is very crucial for people

**IMPORTANT TO READ?** 

to learn how to read. Personally, from my own experience, I learned so much from just reading when I was young.

**DO YOU PREFER SHOPPING ALONE OR WITH OTHERS?** 

Personally, I would say that I prefer going shopping with my friends especially when I go shopping for clothes because naturally I'm a very indecisive person and they would always help me pick what's best for me.

 **WHAT IS THE MOST POPULAR SPORT IN YOUR COUNTRY?**

Well, to be honest, I have no idea about this because personally I'm not into sports. However, if I have to answer your question, I would say that it's probably football because I've seen a lot of football fans in my country.

 **DO YOU THINK CHILDREN SHOULD WATCH TV?**

Even though \_\_\_\_\_, \_\_\_\_\_.

Detrimental

Well, honestly I think children should watch TV because even though a lot of people think the TV is detrimental for children's development, I would say that it's actually beneficial for children. Personally, from my experience, I used to watch a lot of English movies when I was little, and that's how I learned English when I was young.

## #2: FANCY WAYS TO EXPRESS YOUR OPINION

### INDICATE HESITATION

**ADVERB:** *Perhaps, probably, possibly, maybe*

- *I suppose that, perhaps,...*
  - **What do young people do after school in your country?**
    - You know, it depends from person to person, but I suppose that perhaps, they enjoy watching television. I would say the majority of them would watch TV because, you know, they are very busy with their work, so after work they would want to do something that is relaxing, and that is, to watch TV series and comedies.
- *Well, I have mixed feelings about this. Perhaps, on the one hand, + S +V. On the other hand....*
  - **What type of music do you like?**
    - Well, I actually have mixed feelings about this question, so I would say that perhaps on the one hand, I like dance music because it can relax me and I like dancing. On the other hand, I feel like I like songs about heartbreak at times because they make me feel emotional and I like feeling emotional sometimes.
- *I would assume that*
  - **How can we reduce waste in the ocean?**
    - Well, that's a very tough question, but if I have to answer your question, then I would probably assume that the best way to reduce waste in the ocean is probably to avoid using plastics because they will end up in the ocean, which will damage the environment and animals in the sea.
  - *According to xx, I would assume that*
    - **What is the most popular type of music in your country?**
      - Well, that's a very interesting question. I actually never asked myself that question. To answer your question, I would assume that, according to my social media feed, I would assume that it's K-pop

music because, you know, I see news about K-pop stars almost every day on my Facebook page, and on my Twitter, and my Instagram, so yeah, in short, I would say that K-pop is probably the most popular type of music in Thailand at the moment.

- *It depends/ varies*

- **Are people in your country close to their neighbors?**

- Well, let me see. I think it actually depends because if people live in big cities, I don't think that they're that close to their neighbors because the city is very dense and it's very hard to make connections with other people. However, if people live in the countryside, for example, I think that the relationships they have with their neighbors would be really close because it's more intimate and yeah, so I think it really depends on where people live.

 **WHAT IS THE MOST POPULAR SPORT IN YOUR COUNTRY?**

Well, obviously that's a very tough question for me because, personally, I'm not that into sports, but to answer your question, I would probably say that, well, according to my friends and people around me, I would assume that it's football because most of the people around me like football.

**What skills should be taught to kids before they go to school?**

- *Manners.*
- *How to get along with other people.*
- *Apart from their parents*

Well, honestly, I have mixed feelings about this because, on the one hand, manners should be taught before children go to school because it's not something that is taught in school. On the other hand, however, I would say that, it's also important to teach children how to get along with other people because this is going to be the first time meeting other people and actually living

with other people, so I would say that it actually depends.

**How has the size of the family changed in the last few decades in your country?**

- *People who struggle financially.*

Well, it actually depends because there are many types of families in my country. However, if I have to answer your question, I would say that you know, a rich family or a family with a lot of money will probably have more children. However, I would also assume that you know, a family that struggles financially would have fewer children, so the size of the family would be smaller.

**What do teenagers in your country use cell phones for?**

Well, it actually depends because I've seen a lot of teenagers use their cell phones for educational purposes, for example, for online courses. However, I've also seen a lot of teenagers use their cell phones for social media, especially for Instagram, because nowadays, phones have really high quality cameras.

**Are handwriting problems more common in boys?**

- *It has nothing to do with gender but it has more to do with the children.*

Well, that's a very interesting question. However, if I have to answer the question, then I would assume that it has nothing to do with gender. According to my experience, it has more to do with the children, I would say.

## #3: HOW TO ORGANIZE YOUR OPINION

## **Pattern**

*Well, in my opinion, there are a couple of things (xxx) that....(I can think of..)*

- *The first reason is that/ The first thing that comes to my mind is that*
- *Secondly, thirdly, lastly*
- *But most importantly*

### **What's the difference between living in the city and in the countryside?**

*The first difference that I can think of is that living in a big city is a lot more convenient for you. The second difference is that living in the countryside is more peaceful because there are fewer people, it's less crowded, and life is a lot simpler. But most importantly, I believe the main distinction between, say, the big city and the countryside is the cost of living.*

### **What can we do to stop the greenhouse effect?**

*Well, there are a couple of actions that I can think of. The first thing that comes to my mind is that people can avoid using plastic bags, so when they go to the supermarket, they could just use eco-friendly bags instead. But the most important thing is that I think the government should improve public transport so that people reduce the use of private cars and use public transport instead.*

### **What kinds of people do you like to make friends with?**

*Well, there are a couple of qualities that I look for in a good friend, and the first thing that comes to my mind would be loyalty. I would love my friend to be loyal, and that would mean that they wouldn't talk behind my back. Secondly, they have to be honest because I am a very straightforward person and I'd like my friend to be as honest as possible. But most importantly, I think that we have to be compatible, which means that we have to be able to get along with each other, because if we don't have anything in common, it's going to be tough for us to bond as friends.*

## #4 Elaborate your answer with where/ when/ why + your opinion

### **What was your favourite subject as a child?**

I think my favorite subject when I was little was biology. I think I started to like biology when I entered high school. However, before that I used to hate science. The reason why I started to like biology was that I was able to learn about the human body and how the body functions and that was quite fun in my opinion.

### **Describe your hometown?**

I am from Bangkok, Thailand. Bangkok is the capital city of Thailand, and I personally like the city because, even though it's chaotic sometimes, I like that it's very convenient, so, for example, if I want to go get something to eat at midnight, it's pretty easy because there are a lot of restaurants that are open very late.

### **What's the weather like in your country?**

I would say mostly hot and humid. However, in the north of Thailand, you can be a quarter, and in the south of Thailand, it can be hotter and more humid because it is closer to the ocean. Personally, I like this type of weather because I actually like warm weather compared to the cold weather in European countries.

### **Have you ever been to a wedding?**

Yes, I've been to a lot of weddings since I was little. I used to go to my cousins' weddings when I was younger, but now that I am 27, I go to a lot of my friends' weddings. I like weddings because they're an event where a lot of friends can come together and catch up with each other, especially old friends from high school. Honestly, I love weddings because I just like being surrounded by happy people, and you know, when you go to weddings, you can feel that everybody there is happy and cheerful.
