

Band 7 **SAMPLE ANSWERS**

SPEAKING PART 1

DO YOU PREFER PENS OR PENCILS?

I used to prefer pencils when I was younger because I was very indecisive and I used to like erasing and rewriting. However, nowadays I think that I prefer pens because it's smoother to write and easier to see. But most importantly, I think that it's an adult thing to do.

WHEN WAS THE LAST TIME YOU BOUGHT A PEN OR PENCIL?

I think that it was a very long time ago because ever since I bought an iPad, I have never used a pen or pencil anymore because I can just write down my thoughts and my ideas on my iPad.

I think it was a very long time ago because ever since I started working I've been using the stationery of my workplace, so yeah, it's probably when I was a student, which means many years ago.

HOW WOULD YOU FEEL IF SOMEONE GAVE YOU A PEN AS A GIFT?

Honestly, I would feel a bit weird because I don't use pens anymore, but most importantly, I feel like it's really weird to give someone like stationery unless it's like a very expensive one for collecting.

ARE THERE ANY PAINTINGS ON THE WALL OF YOUR BEDROOM?

Not at the moment, because I like my walls to be empty. It feels better, you know, it's more calming. However, if I have to put a picture on my wall, I would probably choose a picture of a natural landscape, because I think a bedroom should be a place where you feel relaxed, so it's better to have something natural instead of weird artsy paintings or paintings of people, which can be a bit haunting.

ARE YOU GOOD AT NUMBERS?

Honestly, I am extremely bad at numbers because I remember being bad in every class that was related to numbers when I was in high school, whether it be math or physics or anything that's related to numbers. Personally, I think that I am more talented in languages and social science.

DO YOU WANT TO HAVE A JOB THAT DEALS WITH NUMBERS?

Like I mentioned, I totally hate numbers and I think that I am very bad at numbers, so in the future I don't think I'll have a job that's related to numbers. I'd rather have a job that's related to communication, like talking to clients or coordinating with other people, but calculation is definitely not my strong suit.

DO YOU THINK HISTORY IS IMPORTANT?

Honestly, I think that history is absolutely crucial, mainly because I think that, first, people have to understand history in order to learn from the lessons of the past, but most importantly, I think that history teaches us that we are still human and we always make the same mistakes as our predecessors and we are to learn from the mistakes of people who came before us.

DID YOU LIKE SCIENCE IN SCHOOL?

I don't remember much about primary school, but as for high school, I would say that I did enjoy science classes because I used to really like exploring how the human body functions, but most importantly, I think that I was really interested in science because I wanted to pursue a career in a science-related field, such as the healthcare industry.

I don't have a lot of memories of my primary school, but when it comes to high school, I would say that I did enjoy all the science classes, whether it be biology or chemistry because I personally like something that can be explained and science was able to explain things for me. For example, why do we sweat? Why do we breathe? Why do we and how does our body function? Those are the questions that really fascinated me as a young girl.

WHEN WAS THE LAST TIME YOU READ A BOOK ABOUT HISTORY?

Well, like I mentioned, I really don't like history, so the last time I read a history book was probably when I was in school when I was forced to read it for the history class, but generally I'm not the type of person who would automatically read history books unless I am forced to do it.

WHAT DID YOU DO LAST TIME YOU WERE ALONE?

That's an interesting question. I think the last time I was alone was yesterday, and I probably listened to music and I probably danced to it too because, well, usually I am a very busy person, so it's really hard for me to find time for myself, but when I do, I usually listen to music or do things that are related to self-care or relaxation.
