

Bar chart

You should spend about 20 minutes on this task.

The chart below shows the amount spent on six consumer goods in four European countries.

Write a report for a university lecturer describing the information shown below.

You should write at least 150 words.

COLOR CODE

RED : Complex Structure

GREEN : Flow

BLUE : Vocabulary

 Vocabulary

- every, each + singular
- all + plural

The bar chart compares the amount of money spent on different consumer goods, such as toys, CDs, and perfumes, in four European countries: Germany, Italy, France, and Britain.

Overall, it can be clearly observed that British people spend the highest amount of money on every category, **whereas** people living in Germany spend the least on all categories, except perfumes and tennis racquets.

Option 2 : while there are **some inconsistencies** in terms of countries that spend the least on different kinds of products.

 Body 1 : entertainment

Starting with products for entertainment, British people **spend the most** on all categories, which include personal stereos, CDs, and photographic films, at approximately 150,000, 165,000, and 170,000 pounds sterling, **respectively**. **On the other hand**, individuals living in Germany **spend the least** on all the aforementioned products, at just under 150,000 pounds for each product.

 Body 2 : personal belongings

With regard to personal belongings, people in Britain **remain the most significant spenders** of perfumes, tennis racquets, and toys, at 160,000, 150,000, and 170,000 pounds sterling, respectively. **However, although** French people spend the least on perfumes and tennis racquets, both at roughly 150,000 pounds sterling, the Germans **are the least significant spenders** of toys, **as** they spend over 10,000 pounds sterling less than **those living in France**.

 Vocabulary

- TREND = YEAR = increase/ decrease
- inconsistencies (n.) ความไม่แน่นอน syn. variations

what/where/when

The bar chart compares the number of women and men passing their driving exam in one country in Asia over a 30-year period from 1980 to 2010.

Overall, it can be clearly observed that the percentages of both men and women who passed the exam **experienced an upward trend** from 1980 to 2010, whereas **there were some inconsistencies** in the year 2010.

Starting in 1980, 45% of women passed their driving exam, **while** only over 25% of men passed the same exam.

Interestingly, the proportion for women passing the exam **increased moderately** to just 50% in ten years later, **whereas there was also a rise/growth** in the figure for men by 10% to over 35% **across the same period**.

From 1990 onwards, the ratio of women who successfully passed their driving test **continued to grow and peaked** at nearly 70% **before dropping slightly** to 65% in 2010.

Similarly, the figure for men also **displayed a consistent rise** to almost 50%; **however**, the number **remained stable** at 50% by the end of the period.
